

Club DJ Course (DJ108)

This course is designed for anyone with little or no experience of mixing. Whether you are taking your first steps in a career as a professional DJ or just want to create your own mix CDs, these evening sessions are designed to provide long-lasting results in a short time. The sessions are mostly practical mixing, and also include step-by-step instructions on how to record a mix CD to help you get work. Particular attention is given to those critical elements that make the difference between just mixing and being a great DJ: the importance of the playlist, the role of the DJ, the relationship with audience, promoters and club owners, career opportunities and more.

About Musical Styles

The techniques covered in this course apply to any musical style, but we make every effort to provide a course that is as specific as possible to the individual interests of our students. When you apply for a course we ask about your musical preferences, and will book you in a class with the right DJ for that style. Moreover, you are welcome to bring your own tunes (vinyl or CD), and can book unlimited practice time in our DJ booth between sessions.

COURSE OUTLINE	
Topic	Description
Equipment	Learn turntables, CD decks, mixers, cartridges, speakers; choosing the right kit; setting up, maintenance and trouble-shooting.
Vinyl	Hands on records: finding your cue points; reading 'groove maps'; care and maintenance of vinyl records.
CDs	Turntable techniques, cue points, constant key, loop functions and other advantages of working digitally; CD-related issues.
Basic music theory	Beats, bars, song structure and clashing harmonies.
Mixing tools	Gain, equalizers and 'kill' switches, cross-fader curves, digital effects, and creative ways to 'abuse' the mixer.
Monitoring	Headphone and monitoring techniques.
Mixing and blending	From blending to beat-matching, mastering every technique and knowing when to use one over another.
DJ decisions	Defining your sound – playing the dancefloor, which track next?

Mix CDs	How to make a mix CD: planning the mix, attention to levels, dealing with mistakes – the 'perfect' CD.
Business	Where to start: agents, managers, club promoters, DJ etiquette, promotion and marketing, contracts, deposits and getting paid.
MP3s	Intro to mixing with MP3s and other digital formats.
Checklist	Preparing for your gig.
